## H1 2012 Summary

- Group turnover increased by 12.5% to €35.1m. All divisions achieved growth in revenues during the period with our speciality value added dairy business increasing by 23.4%, agri-inputs by 15.6% and produce by 6%
- The profit for the period after tax was €0.25m, down from €1.1m in the first half of 2011. This is mainly attributable to a difficult European and South American season for seed potatoes due to the temporary market oversupply with consequent downward pressure on price and margin as well as continued investment in our speciality value added dairy business, partly offset by an increase in profits in our agri-inputs division
- Share of results from associates increased from €1.3m to €1.5m
- Net finance expense reduced from €1.0m in the first half of 2011 to €0.65m in the first half of 2012 primarily due to a
  foreign exchange gain of €0.3m, in comparison with a foreign exchange loss of €0.6m in the first half of 2011 together
  with an impairment of €0.33m in respect of other investments in the current period
- Net debt reduced from €33.2m at 31 December 2011 to €21.6m at the June half year-end
- Adjusted earnings per share have reduced from 15.2 cents to 4.2 cents for the half year. The Board currently expects full year adjusted earnings to be in the order of €5.1m or 51 cent per share, an increase of 5% on 2011. This is based on the Board's expectations for the second half of 2012 which includes a strong performance from its produce division, when around 75% of profits are typically earned in the final quarter, a continuation of the solid first half performance delivered by its agri-inputs businesses and further growth in revenues in the speciality value added dairy business.
- In January, the planned strategic disposal of our liquid milk and retail agri-stores businesses was completed
- Interim dividend of 7c per share has been maintained

## **H1 2012 Performance Overview**

Following the planned strategic sale of our liquid milk and retail agri-stores business, Donegal is now focussed on its core seed potato produce business and its developing speciality value added dairy business. Our produce business was impacted by what has been a difficult European seed potato market in the first half of 2012. The performance of our seed potato business is materially weighted towards the final quarter of the calendar year and the Board remains confident of a

strong performance for the full year 2012. We continue to invest in developing our speciality value added dairy business. We are satisfied with progress in the UK market where our Rumblers and Good Heavens products continue to secure retail listings. The Irish market remains challenging with continued pressure on consumer spending.

Our main agri-inputs business performed well during the period benefitting from an extended buying season by its farmer customers due to the poor weather experienced in the first half of the year.

Our balance sheet net assets of €59.5m (€5.78 per share) increased from €52.5m (€5.09 per share) at year-end 2011, in the main due to a profit of €7.5m realised in the period from the strategic sale of our liquid milk and retail agri-stores businesses. The €7.5m profit on disposal is shown net of related redundancy costs as an exceptional profit on discontinued operations.

An interim dividend of 7c per share will be paid on 7 December 2012 to shareholders on the register on 16 November 2012.

#### **Summary Operations Review:**

#### **Dairy**

The Group's speciality value added dairy business includes The Different Dairy Company based in Killygordon, County Donegal and our two UK businesses, Chef in a Box and Biogreen. Our strategy for these businesses is to continue to grow and scale up what are essentially early stage businesses and this is reflected in our decision during 2011 to invest in additional management and marketing resources. To date we are pleased with the results of this investment with revenues during the period increasing to €4.9m, a 23.4% increase on the first half of 2011. The segmental result for the business during the period was a loss of €0.95m. However we expect to reduce losses going forward with a view to achieving a breakeven position in 2013 following our investment in these businesses.

The Different Dairy Company produces the Rumblers yogurt and oat pots as a food to go offering focused on the UK market as well as the Organic For Us range of yogurts which are sold in Ireland. Rumbler's performed strongly during the period with further retail listings secured on the back of good momentum during 2011. In contrast to Rumblers, the Organic For Us products face a challenging consumer market in Ireland characterised by continued discounting and promotions which have impacted negatively on margins. Chef in a Box, which provides meal solutions to the hotel and travel sector's, had a solid performance during the period and will start to benefit from its increased capacity following relocation to a larger and more modern facility during 2011. Biogreen, with its Good Heavens range of premium and ethnic yogurt based products, performed strongly on foot of product launches during the period.

## **Agri-inputs**

A good result was delivered by the agri-inputs division. The business benefited from an extended buying season by customers due to the poor weather experienced in the first half of the year. Forward prices of agricultural commodities are very high as a scarcity is expected due to global weather conditions and demand is expected to be high in the second half of 2012. The segmental profit increased by 10.5% to €1m in the period.

### **Produce**

Turnover in our produce division increased from €12.1m to €12.8m, an increase of 6%. This was also broadly the increase on an underlying basis when taking into account the impact of the carryover of delayed shipments from December 2010 to January 2011 and the acquisition of AJ Allan in November 2011. However, the division incurred a loss of €0.63m as a result of very challenging markets in Europe and South America in the first few months of 2012 due to the impact on pricing of an over supply of seed on the market. However, notwithstanding the impact of this over supply, which does occur in the industry from time to time, the Board expects a strong performance for the second half of the year, when around 75% of profits are typically earned in the final quarter. The integration of AJ Allan is progressing to plan with the commencement of the conversion of AJ Allan's 12,000 tonne growing capacity from generic seed varieties to Irish Potato Marketing's proprietary varieties. With our continued strategic focus and investment we remain confident that our core seed potato business will become a leading global supplier of proprietary certified seed and will be key to driving overall Group growth and profitability going forward.

## **Property and investments**

There were no acquisitions or disposals during the period. Rental income continues to be satisfactory, increasing during the period mainly due to the rental income earned on the freehold retail agri-stores portfolio, which remain in the ownership of Donegal following the sale of its liquid milk and retail-agri stores businesses. Our portfolio of shares held in One 51 was devalued by €0.33m in the period (2011: Nil).

#### **Associates**

The Group's share of associate investment results, in the main Monaghan Middlebrook Mushrooms, increased from €1.3m in first half of 2011 to €1.5m during the period. As previously disclosed the company is extremely well invested and continues to have a leading position in all its main markets. In January 2012, Monaghan Middlebrook Mushrooms acquired a majority shareholding in Dutch company Walkro International, one of the largest producers of mushroom substrate in Western Europe. During the period Mr. James Osborne joined the Board of Monaghan as Independent Chairman.

#### **Finance**

The Group currently has committed bank facilities of €26.3m, sufficient to meet its requirements. Discussions have commenced with regard to the roll-over of the Group's €11m revolving debt facility which falls due in January 2013.

Net debt at 31 December 2011 was €33.2m and at 30 June 2012 was €21.6m, higher than anticipated due to cash outflows on operating activities in the main as a result of a significant increase in working capital, in particular in our agri-feeds and value added dairy businesses. However, capital expenditure reduced from €1.4m in the first half of 2011 to €0.4m during the period reflecting reduced requirements following the sale of our liquid milk and retail agri-stores businesses.

#### Outlook

The Board currently expects full year adjusted earnings to be in the order of €5.1m or 51 cent per share, an increase of 5% on 2011. This is based on the Board's expectations for the second half of 2012 which includes a strong performance from its produce division, when around 75% of profits are typically earned in the final quarter, a continuation of the solid first half performance delivered by its agri-inputs businesses and further growth in revenues in the speciality value added dairy business.

#### (1) Reporting entity

Donegal Creameries Plc (the "Company") is a company domiciled in Ireland. The condensed consolidated interim financial statements of the Company as at and for the six months ended 30 June 2012 comprise the Company and its subsidiaries (together referred to as the "Group") and the Group's interests in associates and jointly controlled entities. The consolidated financial statements of the Group as at and for the year ended 31 December 2011 are available upon request from the Company's registered office at Ballyraine, Letterkenny, County Donegal.

### (2) Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with international financial reporting standard (IFRS) IAS 34 *Interim Financial Reporting* as adopted by the EU. They do not include all of the information required for full annual financial statements, and should be read in conjunction with the consolidated annual financial statements of the Group, prepared in accordance with IFRS as adopted by the EU (EU IFRS) as at and for the year ended 31 December 2011. The financial information presented herein does not amount to statutory financial statements that are required by company law to be annexed to the annual return of the company. The financial statements for the financial year ended 31 December 2011 are annexed to the annual return to be filed with the Registrar of Companies. The audit report on those EU IFRS financial statements was not qualified.

The financial statements are presented in euro, which is the company's functional currency. All financial information presented in euro is rounded to the nearest thousand. They are prepared on the historical cost basis except that the following assets and liabilities are stated at their fair value: derivative financial instruments, financial assets classified as available-for-sale and investment property. These condensed consolidated interim financial statements were approved by the Board of Directors on 29 August 2012.

## (3) Accounting policies

The accounting policies and methods of computation adopted in the preparation of the Group Condensed Consolidated Interim Financial Statements are consistent, except as noted below, with those applied in the Annual Report for the financial year ended 31 December 2011 and are described in those financial statements.

Except as described below, the Group did not adopt any new International Financial Reporting Standards (IFRS) or interpretations in the period that have had a material impact on the Group Condensed Interim Financial Statements for the half year.

# (a) Change in accounting policy

As of 1 January 2012, the Group has changed its accounting policies in the following areas which do not have a material effect on the results or financial position of the Group:

Amendments to IFRS 7 Disclosures – Tr

Disclosures - Transfers of Financial Assets

### (4) Estimates

The preparation of interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates. Except as described below, in preparing these condensed consolidated interim financial statements, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended 31 December 2011.

During the six months ended 30 June 2012, management, in consultation with an independent actuary, reassessed its estimates in respect of employee benefits. The valuation of the defined benefit pension obligation has been updated to reflect current market discount rates and rates of increases in salaries and inflation. The key changes in estimates are discount rate 4.4% (31 December 2011: 5.3%), inflation 2.0% (31 December 2011: 2.0%) and salary increases 3.25% (31 December 2011: 3.25%).

# (5) Segment Information

IFRS 8 Operating Segments requires operating segments to be identified on the basis of internal reports that are regularly reviewed by the chief operating decision maker (CODM) in order to allocate resources to the segments and to assess their performance.

The Group comprises the following reportable business segments:

- Dairy: The production, distribution and marketing of added value dairy products including the Rumblers brand.
- Agri-inputs: The manufacture, sale and distribution of farm inputs.
- Produce: The growing, sales and distribution of seed potatoes and organic produce.
- Property and investments: Includes the rental, development and sale of property assets.
- Other operations: Includes the stevedoring business and corporate activity.

Information regarding the results of each reportable segment is included below. Performance is measured based on segment operating profit/(loss) as included in the internal management reports that are reviewed by the Group's CODM, being the Board. Segment operating profit is used to measure performance; as such information is the most relevant in evaluating the results of the Group's segments. Segment results, assets and liabilities include all items directly attributable to a segment. Segment capital expenditure is the total amount incurred during the period to acquire segment assets that are expected to be used for more than one accounting period.

# (5) Segment Information (continued)

# Entity-wide disclosures

Section 1: Information about products and services

The Group's revenue from external customers in respect of its principal products and services is analysed in the disclosures above.

Section 2: Information about geographical areas and customers

The Group has a presence in several countries worldwide. The revenues from external customers and non-current assets (as defined in IFRS 8) attributable to the country of domicile of all foreign operations are noted above.

## Seasonality

The Group's produce and agri-input divisions are second half weighted. This weighting is primarily driven by weather and global buying patterns.
